

A TRiO Program funded by the US Department of Education

WHAT IS UPWARD BOUND MATH SCIENCE?

Funded by the U.S Department of Education, the Delaware Technical Community College Upward Bound Math Science (UBMS) initiative is a comprehensive program developed to enhance the academic skills, leadership and college readiness of high school students who have the potential or an interest in attending college. UBMS provides students with academic support, career exploration, and technological skill development. In addition, UBMS also provides extensive assistance to students in their college preparation, identification and application process. UBMS offers academic enrichment at Delaware Technical Community College and Saturday programming during the academic year. Students selected to participate remain in the program until their high school graduation.

UPWARD BOUND

Math & Science

OUR MISSION:

Delaware Tech's Upward Bound Math Science Initiative is a federally funded pre-college TRIO program designed to prepare high school students for postsecondary education programs that lead to careers in the field of math and science.

As a federally funded program, there are **no cost** to the students!

QUALIFICATIONS:

- Students who have completed the eighth (8th) grade and must not have completed the eleventh (11th) grade nor reached his/her eighteenth (18th) birthday before June 1st of the program year
- Students attend Christiana, Glasgow, McKean, Newark or William Penn. H.S. or living in the feeder districts.
- Students must also satisfy either the taxable family income Federal eligibility (Title IV) criteria established by the U.S. Department of Education or the first generation criteria (neither parent has graduated from a four - year college) or both. Preference will be given to students who meet both of those criteria.
